GP GARAGE PAGE

garagepage.co.uk

A main-dealer experience for your customers. From your independent garage.

A website for your garage, built and run for you, where customers check their MOT and book online straight into your diary — direct to you, with no booking site in the middle. Reminders that come from you, and a record of every car your customers can see.

- Your website, done for you
- Online booking direct to you
- MOT and service reminders from you
- A timeline for every car
- News, socials and reviews

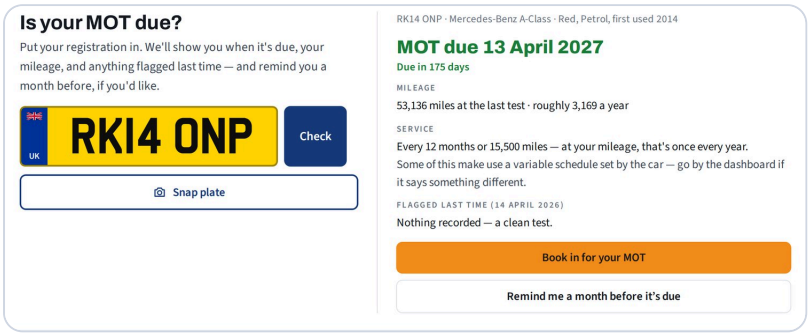

AUTUMN OFFER · 3 months for £1 a month, while we build our case studies

See page 4 →

01 · WHAT YOUR CUSTOMERS GET

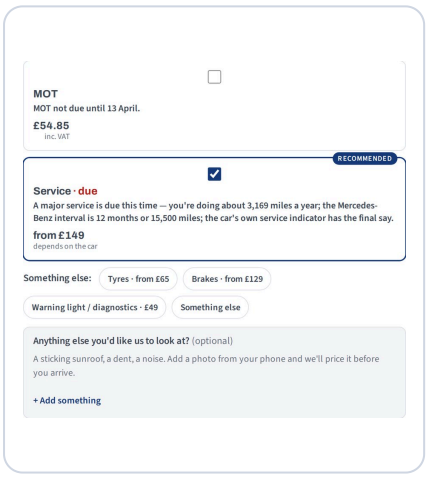

The way a main dealer looks after people. With your name on it.

Your regulars are the business. Garage Page gives them a reason to stay yours, so they come back to you instead of searching for someone else.

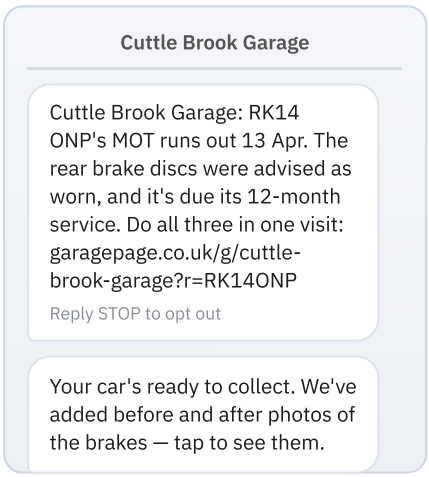

It starts with your own website

We build it and keep it up to date. Customers put their reg in and see when the MOT is due, the mileage and what was advised last time, then book online straight into your diary. Direct to you, with your name on it.

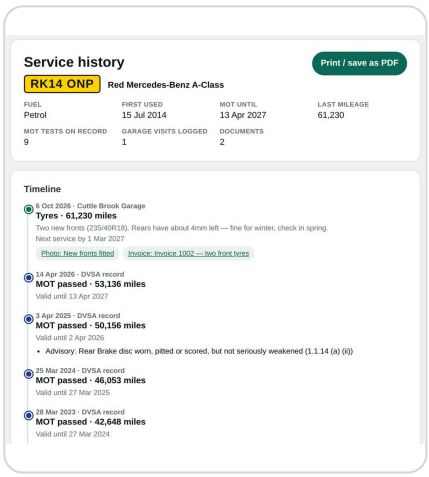

...and book straight into your diary

The right service is suggested for the car and its mileage. They can add anything else they want looked at, with a photo, so you can price the extra work before the car arrives.

Reminders that bring them back

MOT and service reminders sent as your garage, with their last MOT advisories, the manufacturer's recommended service and a link to book. With Reception, they can chat or call to book too.

Their own portal, a timeline for every car

Add before and after photos and videos of the work, and they get a text or email to take a look. When they sell the car, they share the full history with one link.

Every step comes from you. From the first reminder to the day they sell the car, your customers deal with your garage, not a booking site or a call centre.

Screens show Cuttle Brook Garage, our example garage. Messages are examples of what your customers receive.

02 · WHAT YOU GET

The system behind the shop front. And someone to keep it busy.

Your workshop, in one place

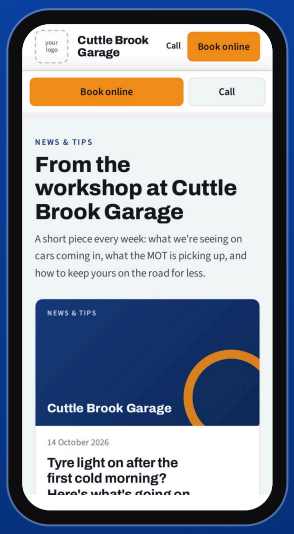

- **The diary** — day by bay, week and month. Phone and walk-in bookings, moves and blocks in seconds.
- **A home screen for the morning** — what to confirm, what to quote, what's ready but not collected.
- **The week ahead** — jobs by type, tyre sizes to order and the cars coming in for service.
- **Finish a job properly** — MOT result pulled from the DVSA, mileage and next service due. Add before and after photos and videos, and the customer is told by text or email.
- **Your customer list** — bring your existing customers in and they're on reminders straight away.
- **More from every visit** — extra jobs flagged with a photo at booking, quoted before the car arrives.
- **Your services and prices** — ready-written, with bundles that show the saving.
- **Logins for your team** — technicians see the work, not the prices.
- **Your data is yours** — export everything to a spreadsheet whenever you like.

Fills your quiet weeks

Because the bookings live in your diary, reminders go out earlier when a week is filling up, and an offer of your choosing goes out when a week looks empty.

Your website, done for you

- **Your own website**, built, hosted and kept up to date for you, with online booking straight into your diary.
- **A news post every week** on your website, local to your town and written in your voice.

- **Social posts from your jobs** — photos and short videos from the workshop, plates blurred, ready for you to approve with one tap.
- **Google reviews** — every customer asked for one as part of the handover.
- **Featured on Garage List**, our national directory of MOT and service centres — a highlighted listing with a Book now button straight into your diary.

Not another booking site.

No commission and no fee per booking. The customers are yours.

Not just reminders.

Your website, the diary, the record and the reminders all work as one.

Keep what works.

Already have a website or garage system? We can run alongside it.

03 · PRICE, AND HOW TO START

One price. Everything included.

GARAGE PAGE

£249 a month + VAT

- Everything on pages 2 and 3
- Your website built for you — no setup fee
- No commission, no fee per booking
- Cancel any time; your website is yours if you leave
- 30-day money-back guarantee from the day you go live

GARAGE PAGE + RECEPTION

£399 a month + VAT

Everything in Garage Page, plus a reception agent that answers your phone 24 hours a day, and whenever you're busy under a car. Every phone call and web chat lands on one board, and bookings go straight into your diary.

KEEP YOUR OWN WEBSITE OR SYSTEM

We'll run the booking page and reminders alongside what you have. Priced for your setup.

AUTUMN OFFER

3 months for £1 a month

This autumn we're building our case studies and social posts with real garages. Go live with Garage Page and let us tell your story, and your first three months are **£1 a month + VAT**. After that it's £249 a month + VAT, and you can still cancel any time.

What we ask in return

- Go live properly — your diary and customer list in Garage Page
- A quick call every few weeks to tell us what's working and what isn't
- Photos and short videos from your workshop for our posts
- Permission to feature your garage — name, logo, a quote and real results — in case studies and social posts

1 A 15-minute call

We show you your website with your own MOT data and answer your questions.

2 We set you up

Your hours, prices and services, and your existing customers brought in.

3 You go live

Bookings land in your diary and reminders start going out as your garage.
